

# IntelleCT

**IntelleCT** is a standard Coiled Tubing String wherein a mono conductor wire, encapsulated in a 1/8" stainless steel tube, is inserted. The cable is used to send signals to & from the toolstring.

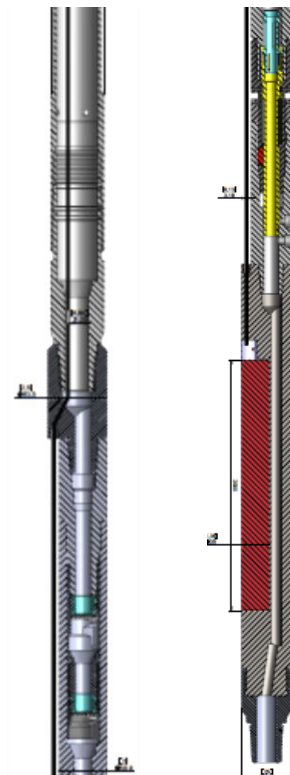

## IntelleCT

- Real Time down hole measurements.
- Exact CT down hole depth indication via CCL and Gamma ray.
- Differential pressure over nozzle / motor.
- Communication cable installed in CT string.
- Ability to pump corrosive fluids as acid, perforating sand/gel.
- Ability to pump standard activation balls for BOSS and circulation Sub through CT.
- Use of standard proven CT tool assembly.
- Ability to install any Third party (ballistic) tools in conjunction with IntelleCT toolstring.
- Most universal software in oil industry "warrior" used.
- Down hole data integrated in CT data acquisition software
